Some culture media are used in techniques that require accessories and/or consumables.

Cryo-preservation system for the storage and maintenance of microorganisms and culture collections

CRYOINSTANT® is a simple method for maintaining culture collections that offers distinct advantages to repetitive culturing and avoiding such problems as contaminated cultures, loss of viability and loss of original characteristics due to biochemical and genetic changes. The system consists of a vial with 25 coloured plastic beads inside a cryopreservative solution.

CRYOINSTANT® allows the storage of 25 identical cultures in one vial. Large number of strains can be stored in a small space inside a freezer. Individual beads are either streaked on a plate or resuscitated in a suitable broth. Vials are available in six different colours to allow sorting by species, samples, origin, etc.

Cryoinstant®. Microorganism preservation vials

ubes for the long-term conservation and storage of microorganisms at low temperatures on a porous support.

Cryoinstant® is a simple method to preserve microorganisms, which offers many advantages in repetitive culture, avoiding contamination, loss of viability and even loss of their original characteristics due to biochemical and genetic changes. The system consists of a vial containing 25 colored plastic beads within a cryopreservative solution.

Cryoinstant® allows the storage of 25 identical cultures in a single vial. A large number of strains can be stored in a limited space inside the freezer.

The individual beads placed on the plate or inside the tube allow the microorganisms adhered to them to be recovered.

The vials are available in six different colors that allow classification by species, samples, origin, etc.

Expiration: 2 years.

Oxford towers for antibiotics assay

Towers for the certification of antibiotics. Stainless steel exterior Ø 8 mm, interior Ø 6mm and 10 mm height , with a double bevel.

Polystyrene Petri dishes

Scharlau Petri dishes are manufactured in high transparency PS following a fully automated process with strict quality controls, giving them the strength and transparency ideal for microbiological applications. Their great mechanical resistance makes them non-deformable. The dishes with winds facilitate the circulation of the air and avoid the possible condensation. Aseptically produced in 'Cleanroom ISO 6' rooms, a level of sterility is guaranteed. In addition, sterile dishes are sterilised by radiation. They have a ring to facilitate and improve stability once stacked.

Stainless steel connector for culture mediums bags

Stainless steel connector for culture mediums bags

Sterile bags for homogenization and analysis of solid samples

High quality cellulose nitrate filtration membranes specially indicated for use in microbiological control. White membrane, with grid to facilitate counting. Sterile, individually packaged.

Sterile membranes for microbiological control

High quality cellulose nitrate filtration membranes specially indicated for use in microbiological control. White membrane, with grid to facilitate counting. Sterile, individually packaged.

Sterile polystyrene planting loops

Inoculation loops sterilised by radiation, manufactured in PS of 1 and 10 µl. Bags in peel-packs of 20 units with lot number and expiry date printed. Delivered with certified calibration and sterilisation.

Amber laboratory bottle

Amber borosilicate glass bottle, with GL45 thread, graduated, blue cap and pouring ring, ISO 4796.

Made of borosilicate glass 3.3.

The bottle, pouring ring and screw cap can be sterilised.

Clear laboratory bottle

Clear borosilicate glass bottle, with GL45 thread, graduated, blue cap and pouring ring, ISO 4796. Made of borosilicate glass 3.3.

The bottle, pouring ring and screw cap can be sterilised.

*It includes retrace code and double graduated scale.

Filter tips

Highly accurate and transparent filter tips. They fit easily and safely to all major brands of pipettes. Free from DNase and RNase. Not pyrogenic. With graduation marks.

Universal tips for automatic pipettes

New range of Scharlau Polypropylene tips. Compatible with most brands of automatic pipettes (Sartorius, Brand, Eppendorf, Finnpiquette, Gilson, Socorex, etc). Available in bags, autoclavable racks, radiation sterilised racks and individually packed sterile tips.
